Junior Web Developer cover letter

Dear Hiring Manager,

I am writing to express my interest in the Front End Developer position. With over three years of experience as a web developer and a strong background in C#, Visual Studio, PHP, ASP, JavaScript, CSS, MS SQL, and MySQL, I am confident that my skills align well with your team's needs.

During my time at Trycycle, I specialized in web service maintenance and played a key role in developing monthly event pages for a shopping mall, which enhanced my communication and collaboration skills.

I am currently residing in Dublin, Ireland, but I will be moving to London in January 2025. I have a Working Holiday Visa, which allows me to work full-time for up to two years. I am also very interested in React and have been working on small toy projects daily to deepen my understanding and skills in this area.

As a junior developer from Korea with a passion for web development, I am eager to bring my talents to your company and contribute to your team's success. Thank you for considering my application. I look forward to discussing how my qualifications align with your needs.

Sincerely,
Lucy
